Onelogin - Key Services

Single Sign-On
Sign in once and you're done.
A single, secure password unlocks an SSO portal for single-click access to apps for all your users.

Multi-Factor Authentication
Protect access to all your apps with additional authentication factors.

Protect - Our one-time-password (OTP) app, included.

Adaptive - Step it up with machine-learning.

Self-Service Password Reset
OneLogin can reset passwords inside of user directories like AD and LDAP.

Self-Service - users can reset their own passwords, saving our customers tons of time and money on helpdesk tickets.

Provisioning (User Lifecycle Mgmt.)
<u>Provisioning</u> - Quickly create, update, and delete users inside supported apps.
<u>Roles and Mappings</u> - Automate and simplify the assignment of apps with user attributes.
<u>Rules</u> - Assign & manage user permissions for all apps.

Desktop
<u>Certificate Authentication</u> - Simplify login by eliminating the need to enter a password.
<u>Desktop Password Enforcement</u> - Enforce a strong credential for Mac or Windows desktop login without AD.

Access
OneLogin extends the reach of the OneLogin UAM platform to apps hosted on-prem for centralized management, policy enforcement, and a single portal for end-users to access all apps.
